LRUT Thickness Testing of Product Pipelines, Tuticorin Terminal

Indian Oil Corporation Ltd engaged SOLAS MODU Marine Services to carry out thickness testing of product pipelines by long range ultrasonic testing (LRUT) at its Tuticorin Terminal in Thoothukudi, Tamil Nadu. The scope covered the naphtha, furnace oil (FO) and HFHSD product lines serving the terminal.

LRUT screening was applied along the product lines to assess wall thickness condition, with results reported to the terminal for evaluation and follow up. The Work Completion Certificate dated 30 December 2020 records that the work was completed satisfactorily and that delivery ran ahead of schedule. The project closed in 2020.

SERVICES PERFORMED

- LRUT thickness testing
- Furnace oil (FO) pipeline screening
- Wall thickness condition assessment
- Naphtha pipeline screening
- HFHSD pipeline screening
- Condition reporting to the terminal
