## Inspection and NDT of Cranes, Mumbai High Asset

Between 2022 and 2024, SOLAS MODU Marine Services carried out inspection and non-destructive testing of cranes for Oil and Natural Gas Corporation Ltd across the Mumbai High (MH) Asset in the Arabian Sea. The scope covered crane inspection together with the associated NDT examinations on the asset's offshore installations.

Inspection teams mobilized to the asset to examine the cranes and applied NDT methods to detect service induced degradation. Findings were recorded and reported to ONGC to support continued safe crane operation and maintenance planning across the asset. The contract concluded in 2024 with the scope completed.

SERVICES PERFORMED

- Offshore crane inspection
  - Mumbai High Asset campaign coverage
  - Inspection reporting to ONGC
- NDT of crane structures and components
  - Defect recording and evaluation
