Rate Contract for NDT Services on Offshore Drilling Rigs

SOLAS MODU Marine Services holds a rate contract with Oil and Natural Gas Corporation Ltd for non-destructive testing services on eight ONGC owned offshore drilling rigs operating in Indian waters. Awarded in 2023, the contract remains in force through 27 September 2026 and covers the corporation's owned drilling fleet.

Services are called off against agreed schedule rates as inspection requirements arise on each unit. NDT crews mobilize offshore to perform the specified examinations, and results are documented and reported to ONGC for integrity and maintenance follow up. The arrangement provides the drilling fleet with a standing inspection resource for the duration of the contract.

SERVICES PERFORMED

- Rate based NDT call-off services
 - Offshore crew mobilization
 - Inspection reporting to ONGC
- Coverage of eight ONGC owned drilling rigs
 - Specified NDT examinations on demand
