## NDT Services for Process and Unmanned Platform Vessels and Piping

Under an offshore services contract awarded in 2024, SOLAS MODU Marine Services carries out non-destructive testing of vessels and piping on process and unmanned platforms operated by Oil and Natural Gas Corporation Ltd across its Western Offshore assets in the Arabian Sea. The contract remains in force through 14 April 2029 and is active at the date of publication.

Inspection campaigns are executed by qualified NDT technicians mobilized to the offshore installations in coordination with platform operations. Vessels and piping systems are examined to the client's inspection requirements, and findings are documented and reported to ONGC to support asset integrity assessment and maintenance planning across the platform inventory.

SERVICES PERFORMED

- NDT of platform vessels
  - Offshore inspection campaign execution
  - Integrity reporting and documentation
- NDT of process and unmanned platform piping
  - Qualified NDT technician mobilization
